If there be such nn emotion as gratitude in the breasts of Kentuckians, little or much, it commands at our hands the erection of this proposed monument.— True, this may not be the proper time to make the appropriation. I have doubted the expediency of more appropriations this session, and have oted against many that have been made. But, Monday of February, 1860. sir, notwithstanding my semples on this subject, I cannot vote against this bill. In doing so, I should think myself ungrateful to the memory of one of our greatest benefactors, I, sir, apprecinte the scruples which I know will prompt many of my lellow members to vote against the bill Knowing that they have the highest reguel for the memory of Daniel Boone, and leel in their hearts an endearing gratitude to him for his long

BLANDY'S PATENT

PATENTED PORTABLE STEAM ENGINES!!

First Premium at Three Successive OHIO STATE FAIRS!!

5,000 to 10,000 Feet Lumber per Day STEAM ENGINES FOR THE PEOPLE

Blandys' Steam Engine Works!!

THE BLANDY PORTABLE STEAM SAW MILL is one of the most important and successful inventions of the age; is strictly pertable, requiring no building or mesonry; readily transported on two wagons; is set down on timbers bedded in the earth; cuts amounts of humber per day almost incredible to those who for the first time hear of its performances; requires no professional Engineers or Sawyers, but is adopted to, and in the great majority of cases, operated by parties previously unacquainted with the Steam Engine or Sawing. It pays owners and operators very satisfactorily, and a bod, begrindges it its earnings. Makes good lumber. Costs less than the commonest fixed mills.

monest fixed mills, verything necessary for actual operation, except or and fuel and the timbers upon which to set it, turnished with each sull unless otherwise pro-

vided for THF BLANDY PORTABLE STEAM ENGINE is just as useful and successful for all other purposes as sawing lumber, is made of any required power, but of one uniform style and design, from the smallest to the largest, (either coal or wood, separately or mixed, may be used for fuel) are used for threshing grain, and for other farm and plantation work, and tor all manufacturing and mechanical purposes. The Blandy Portable saw Mill or Engine has obtained the First Premium at three successive Ohio State Fairs, 1857, 1858, 1859; the First Premium at every State and County Fair at which they have been on exhibition. Notwithstanding the hard times, our orders steadil, increase, affording the most substantial evidence of the estimation in which our machinery is held by the people.

The peculiar teatures which render our Steam Enginesso successful and popular are patented, and are not move used by any other builters.

Having a very larg and perfectly equipped establishment, with an anophe capital, and every desirable facility for the manufacture of our machinery, it is produced at the very lewest cost, and we are consequently enabled to sell Steam Enginesat lower prices than they have ever been sold before, so as to bring them within the reach of the people who use them.

Circulars containing descriptions, prices, &c., illustrated by engavings, with reports of operators, forwarded to all applicants.

Our published statements of operators are selected from our business correspondence, and are meyer solicited. As mines, dates, and post-offices are always given, letters of inquiry may be addressed to them.

* * Our Engine works up to any speed we desire; in fact we often have more power than we can use, and havo to len'e the fire door open when sawing dry timber. In sawing green poplar we use about half the slafes, but consume the other half in running our Grist Mill two days in the week. We make 30 busheds commeal per hour with a pair of Burriss 30 inch hurrs. You may think that fast, but it is true; and we run a flouring mill at the same time, both coupled directly to the rugine. * * My mill is quite popular, not only as a saw, but grist mill, und I must give the Blandy Portable Steam Engine at Last half the credit, for it works at all times Like. A Think of Like. We have had but very hitle trouble in keeping everything in order without the aid of a machinist or engineer. I had a man with me three days who had been used to a stationary engine. Since then a boy attends the engine, and does it well. As to my saw, we can cut just what we please—have cut at the rate of 1350 feet per hour. The saw never heats in my kind of timber. Lumber is in good demand, so that up to this time I cannot get a supply for myself.

and we shall see no more of them in this part of the country.

It is a settled point, and given up by all who have seen Blue Dick, that it is far ahead of any thing ever introduced into this part of the State. Blue Dick got the first premium at the Foir of the North Kentucky Agricultural and Mechanical Association, hast month, and was immensely popular with every body.

Since our farmers have seen Blue Dick hitched to a Thrashing Machine, they all want him next year, but he easi't thrush then all in a week or two, soit's no use talking, I have got to have a mate for him.
